PROJECT

Chat app 🔗

HTML · CSS · Javascript · Socket.io

- A simple chat app build on websockets, users can join room, text and share images.

Leaderboard 🔗

Express · Bootstrap · MongoDB

- This application shows the top scorers on my class
- Scraped the GPA of my classmates from the college website automated by selenium, validated the data, made a schema using mongoose and pushed into mongodb atlas.

Feedback management system 🔗

HTML · CSS · PHP · MYSQL

- This application can be used to collect feedback from student and admin can see the results and generate pdf document.
- This application evaluates different parameters separately which helps faculty understand fields where improvement is needed.
- Features like generating circulars makes it usable for authorities for decision making.

SKILLS

🔗 HTML
CSS
Javascript
Java · Python · PHP
